N/A - Not available; N/D - Not determined; N/R - Not rated; N/E - Not established

**SECTION V - HEALTH DATA****TOXICOLOGICAL TEST DATA:**

Rat, Oral LD50 = 296 mg/kg  
 Rabbit, Dermal LD50 = 374 mg/kg  
 Rat, Inhalation LC50 (4 hr) = 0.63 mg/L  
 Rat, Inhalation LC50 (1 hr) calculated = 2.52 mg/L  
 Rabbit, eye Irritation - Moderately irritating  
 Rabbit, Skin Irritation - Minimally irritating  
 Guinea pig, Dermal Sensitizer - Not sensitizing

No evidence of carcinogenicity was observed in the mouse.

An increase in tumors was observed in the rat thyroid, but only at a very high dose.

It has been determined that the mechanism of tumor induction only occurs at high doses in rats.

Therefore, fipronil is not considered to pose a carcinogenic risk at low human exposure levels.

**OSHA, NTP, or IARC Carcinogen:** No.

**EFFECTS OF OVEREXPOSURE:**

**See Product Label and Directions For Use for additional precautionary statements.**

Warning! May be fatal if inhaled, swallowed or absorbed through skin. Eye irritant.

Acute eye: Causes redness, irritation, tearing. Substantial but temporary eye injury.

Acute skin: May be fatal if absorbed through the skin. May produce symptoms similar to those from ingestion.

Acute Inhalation: May be fatal or harmful if inhaled. May produce symptoms similar to those from ingestion. May cause shortness of breath, excitement, involuntary shaking, convulsions, irritability.

May be fatal if swallowed. May cause shortness of breath, involuntary shaking, convulsions, excitement.

This product does not contain any ingredient designated by the IARC, NTP, ACGIH, or OSHA as probable or suspected human carcinogens.

Medical conditions aggravated by exposure:

Inhalation of product may aggravate existing chronic respiratory problems such as asthma, emphysema, or bronchitis.

Skin contact may aggravate existing skin disease.

**FIRST AID PROCEDURES**

**If swallowed:** Call a poison control center or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to by a poison control center or doctor. Do not give anything to an unconscious person.

**If on skin or clothing:** Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control center or doctor for treatment advice.

**If inhaled:** Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably mouth-to-mouth if possible. Call a poison control center or doctor for further treatment advice.

**If in eyes:** Immediately hold eyelids open and flush with a steady, gentle stream of water for 15-20 minutes. Get medical attention.

**Note:** Inhalation of product may aggravate existing chronic respiratory problems such as asthma, emphysema or bronchitis. Skin contact may aggravate existing skin disease.

**Note to physician:** All treatments should be based on observed signs and symptoms of distress in the patient. Consideration should be given to the possibility that overexposure to materials other than this product may have occurred. Treat symptomatically. No specific antidote available.

Treatment for Fipronil overdose: Recommendations for treatment are based on anticonvulsant therapy as routinely administered to humans. Phenobarbital or diazepam may be useful in controlling convulsions induced by fipronil.

For phenobarbital: Start with 10 to 20 mg/kg of phenobarbital in rapid intravenous perfusion (about 60 mg/minute in adults) and continue according to the patient's response. For diazepam: Start with 10 to 30 mg diazepam by intravenous injection according to body weight. This dose is to be repeated every 10 to 30 minutes according to the patient's response.

Even when symptoms of fipronil intoxication are rapidly reversed by treatment, the treatment must be continued for several days, gradually decreasing the dose of anticonvulsant based on the patient's clinical response. This is necessary due to the slow elimination of the compound.

**SECTION VI - REACTIVITY DATA****STABILITY:** Stable under normal conditions.**CONDITIONS TO AVOID:** Avoid direct sunlight and extreme heat.**CHEMICAL INCOMPATIBILITY:** Strong bases, strong acids and strong oxidizing agents.**HAZARDOUS DECOMPOSITION PRODUCTS:** HF, NO<sub>x</sub>, SO<sub>x</sub>, HCl and oxides of carbon.**HAZARDOUS POLYMERIZATION:** Will not occur**CONDITIONS TO AVOID:** None**CORROSIVE TO METAL:** N/A**OXIDIZER:** N/A**SECTION VII - PERSONAL PROTECTION**
